## Education

Year	Degree/Examination	Institution/Board	CGPA/Percentage
2019	M-Tech(Mechanical)	Saveetha University.Chennai	6.7/10.0
2013	12th	Narayan junior college,Hyderabad	87.4%
2011	10th	Gurukula vidya peeth high school,Hyderabad	85.0%

## Work Experience

→ Currently working as Quality Assurance engineer at Toppr Byjus  
→ Worked as Front End intern for 5 months at Toppr Byjus.

November 2020 – Present

## Internship and Certifications

- React certification by Udemy.
- Earned skill badges in HTML,CSS&Java script from LinkedIn.
- Technical stack learned:HTML, CSS, JavaScript, React
- Participated in various coding contest organized by the platform.
- Worked on various projects like Tic-Tac-Toe game, Movie App,Food Order App,Expense Tracker, AddQuote App .

## Projects

### Tic Tac Toe using React | self

- A simple Tic-Tac-Toe game
- Features: Automatic player switching, color coding to show the winning combinations.
- Tech Stack: HTML, CSS, Javascript, React.

### Movie App | self

- This project is for User to fetch the movies he desired by searching the Key word.
- In this project I had used omdb rest ful api, for data and used redux tool kit for fetching data
- For routing I had used React-router and for Styling I used Scss.
- Features: On every load the position of images will be changed and the repeating image will change too.
- Tech Stack: Html, CSS, JavaScript,React.

### Food App | Self

- By using this app ,user can add food to cart.
- I had used hardcoded data ,which will be displayed on the screen,and user can add food item required to the cart and user can edit the cart any time
- All the actions done by the user are recorded and can be sent to the Backend.
- In this project I use context api & use reducer.
- Tech Stack: Html, CSS, JavaScript,React.

### Add Quotes App | Self

- This project is for User to add the Quotes he desired.
- In this project user can add the quotes by himself and all the quotes added will be displayed in the view quotes section.
- User can anytime edit ,delete the previous quote added.
- For routing I had used React-router.
- User can navigate between the pages using router and implemented lazy loading aswell
- Tech Stack: Html, CSS, JavaScript,React.

---

## Skills

- Computer languages JavaScript, CSS, HTML, Java,
- Frame works- React, Bootstrap,Selenium.
- Soft Skills Creativity

---

## Co-Curricular Activities

- Cricket U19 regional player.
- Involvement in Green Revolution Global Program: An initiative by international center for culture & education to Educate, Inspire & Act against Climate Change.
